

GPPCP articulated the following foundations for all partnership work -

- ◆ The client and the client's context are the centre of all planning and service delivery along the continuum of care
- ◆ All activity should be based on reliable evidence either demographic or evaluated best practice
- ◆ All programs and activities should be thoroughly evaluated
- ◆ Coordinated intervention should focus on early in life and early in illness
- ◆ Services reorientation is prevention focussed
- ◆ Coordination of services and integration of planning and service delivery
- ◆ GPPCP is used as a platform for addressing gaps in service through data collection, lobbying for reorientation of services

Strategic Directions 2009/2012 for GRAMPIANS PYRENEES PRIMARY CARE PARTNERSHIP (GPPCP)

*The vision of
 Grampians Pyrenees
 Primary Care
 Partnership is for a
 healthy and well
 community*

GRAMPIANS PYRENEES PRIMARY CARE PARTNERSHIP STRATEGIC PLAN 2009 - 2012

SHARED VISION:	A healthy and well community (our aspiration)
CORE BUSINESS:	Coordination through partnerships (what we do)
FUNCTIONS:	Integration, capacity building, advocacy and growing local opportunities (how we will do it)
VALUES:	Supportive, Collaborative and Empowering (the way we do it)

STRATEGIC PRIORITIES

- ◆ Coordinating approaches to prevention and management of Chronic Disease- with a focus on prevention and early intervention
- ◆ Coordinating mental health and well being services across the continuum of care- with a focus on prevention and early intervention

PRIORITY 1 - Coordinating approaches to prevention and management of Chronic Disease

What we want to do together:

- ◆ Promote healthy lifestyles (with an emphasis on **healthy eating** and **increasing physical activity**)
- ◆ Support coordinated early detection of risk across the member agencies
- ◆ Encourage consistent self-management processes and supports
- ◆ Integrate Chronic Disease initiatives with mental health and well being services
- ◆ Ensure a consistency of service across the care continuum
- ◆ Measure our progress against these goals

PRIORITY 2 - Coordinating Mental Health and Wellbeing Services and directions

What we want to do together:

- ◆ Empower health professionals and the community at large to understand the Mental Health continuum
- ◆ Reduce the risk of high prevalence disorders becoming serious mental illness through more coordinated early intervention
- ◆ Link initiatives in coordination of mental health and wellbeing services and directions with coordinated approaches to chronic disease management and prevention
- ◆ Ensure a consistency of service across the care continuum
- ◆ Measure our progress against these goals
